Bridging the Gap

# ASL Registration Form

## What is American Sign Language ?

American Sign Language (ASL) is a visual-gestural language created and used primarily by at least two million Deaf North Americans of all ages.

## What is meant by gestural?

The units of ASL are composed of specific movements and shapes of the hands and arms, eyes, face, head and body posture. These movements or gestures serve as the 'words' or 'phrases' and 'intonation' of the language.

## What is meant by visual?

Since ASL uses body movements instead of sound, 'listeners' or 'receivers' use their eyes instead of their ears to understand what is being said. Because of all linguistic information must be received through the eyes, the language is structured to fit the needs and capabilities of the eyes. In other words, ASL has its own grammatical rules.
